Alphabetical Reference Index to IEC 950
Alphabetical Reference Index to IEC 950

(IEC 950 second edition, including amendments 1, 2, 3 and 4)
Brief history

IEC 950, the safety standard for Information Technology equipment, is a large and complex document dealing with subjects as diverse as electrical safety, chemical safety, protection from heat and connection to telecommunication networks. It was considered that an index would be useful to facilitate the use of IEC 950 for both designers and test agencies.

In April 1993, ECMA TC12 (Safety for ITE) had the opportunity to organise this work. It was agreed that the document should take the form of a formal ECMA Technical Report, and as such, once approved, it would be made available free to any person or organisation requesting it. Incorporation of the Index in other documents is permitted, and subject to quoting the origin of the document. To this effect, a soft version is available from ECMA.

This Index, modified as necessary, is also part of the second edition of Standard ECMA-129, “Information Technology Equipment - Safety”.

Liaison was maintained with IEC/TC74, and this third edition of ECMA TR/63 takes into account Amendment 4 to IEC 950.

Comments by users of this index on its usefulness and completeness will assist ECMA in the preparation of any future edition, and will be welcomed.

Introduction

This index has been prepared under the auspices of ECMA/TC12 - Product Safety. It relates to IEC 950 - Safety of Information Technology Equipment, second edition (1991), including amendments 1, 2, 3 and 4.

This index is for information only and the selection of indexed items does not imply any particular importance.

Location references are clause or sub-clause numbers or annex letters.

Principal references are printed Bold.

References to the Introduction (Principles of Safety) are indicated as Introduction.

If a term is defined in the standard, its definition is indicated in the index by an asterisk, e.g. RATED VOLTAGE 1.2.1.1*.

A

abnormal conditions  Introduction, 1.3.1, 5.4
heating elements 4.3.20
overload protection 5.4.1, 5.4.3
sequence of testing 1.4.3

TT POWER SYSTEMS 1.2.12.2*
leakage current 5.2.1
protective devices 2.7.4
t.v. distribution systems 1.2.14.7

TYPE TESTS 1.2.14.1*, 1.4.2, 1.5.2, U.2

U
ultra-violet radiation Introduction, 4.3.12
unattended equipment, testing 5.4.8
unearthed (floating) 2.9.1, annex F (figure F.15)
meaning of term ENCLOSURES 2.2.6 (table 0.1 condition 6)
neutral in 3-phase systems 2.7.4 (table 2)
parts and windings 2.9.1, annex (figure F.15)
accessibility 2.1.1, 2.1.2, 2.1.3.1

and TELECOMMUNICATION NETWORKS 6.4.1
TNV CIRCUITS 6.2.1.2
internal wiring 2.1.3
not to be connected to capacitors 2.1.9
electric strength 5.3.2, C.2
in determination of WORKING VOLTAGES 1.4.13, 2.2.7.1
separation 2.1.1, 2.1.2
from stranded wire 3.3.9
within DOUBLE INSULATION 2.2.6
SECONDARY CIRCUITS 2.9.2.2
treated as PRIMARY CIRCUITS 2.9.1
testing 2.2.6
SELV CIRCUITS 2.3.4, 3.1.4, 3.2.8

UNINSULATED conductors and parts see also bus-bars

USERS 1.2.14.6*
instructed about hazards 1.2.7.3
of telecommunication equipment, see also OPERATORS which has the same meaning

USER information 1.3.2, 1.7.2

V
vapour 1.2.13.10
vertical burning tests 1.2.13, 4.4.1, A.6, A.9
vibration see mechanical shock

VOLTAGE, RATED see RATED VOLTAGE

VOLTAGE, WORKING see WORKING VOLTAGE

voltages

generated externally, in SELV CIRCUITS 2.3.1
TNV CIRCUITS 6.1, 6.2.1.3
measurements to earth 1.2
r.m.s. value implied unless otherwise specified selectors 1.7.4, 4.3.1, 5.3.2, G.3

W
warning labels Introduction, 1.7.12, 2.5.1, 2.6.11, 2.7.6, 5.1 (table 16 condition 6), 5.2.5, G.5
water ingress 1.1.2, 2.9.6, 2.9.7, annex T

see also IEC 529

weight see mass

wire, wiring Clause 3

see also building installations

access to
ELV CIRCUITS 2.1.3.1
HAZARDOUS VOLTAGE circuits 2.1.3.2
fixed securely 3.1.3
enamelled, not suitable as safety insulation 2.9.4.2
heating 5.1

insulation
flammability 4.4.3.4, A.6.2
in FIRE ENCLOSURES 4.4.5.1, 4.4.5.2
resistance to oil 4.3.11
internal 2.1.3
over-current protection 2.7.2, 3.1.1
printed 2.5.5, annex F (figure F.13)
sleeved 4.3.7

telecommunication 6.5
terminals 3.3

access 3.2.8
ampacity 3.3.5, 3.3.6
corrosion 2.5.10
marking
earthing conductors 1.7.7.1
power supply conductors 1.7.7.2

temperature 5.1
winding 2.9.4.4, annex U

wound components without interleaved insulation 2.9.4.4, annex U

see also motors, solenoids and transformers

WORKING VOLTAGES 1.2.9.6*, 1.4.11, 2.1.3.1c), 2.2.5, 2.2.7

affected by
transients 2.2.7.2
ripple 2.2.7.2, 2.2.7.3, 2.2.7.4
components 1.6.3, 1.6.4, 2.2.8
determination of 2.2.7
dimensioning of insulation 2.2.7, 2.9
electric strength tests 2.2.7.5, 5.3.2
in transformers 2.2.7.1
meaning, for DOUBLE INSULATION 2.2.7.1

X

x-rays see ionizing radiation
